

To Members of the Commission,

As a licensed Amateur Radio operator I am writing in support of the Commission's proposal to amend its rules to reallocate the segment of 1900 to 2000 kHz to the Amateur Radio Service on a primary basis as detailed in paragraphs 20-24. Amateur radio's use of 160 meters appears to continue to increase and this allocation would provide much need bandwidth for experimentation and general operating by the Amateur Radio Service. The reallocation of 1900 to 2000 kHz to the Amateur Radio service on a primary basis will encourage more operators to use the 160 meter band for local and long distance communication.

Respectfully,  
Anthony Muttillio
